Navigation links include "About the New Semester", "e-learning Blog", "HKU Online Learning & MOOCs", "URFP", "Search...", and a magnifying glass icon. Below the header is a horizontal menu with links: "T&L@HKU", "4-Year UG Curriculum", "Common Core", "Academic Advising", "Experiential Learning", "Horizons", "CICs", "TALIC", and "Staff".

## GenAI

August 24, 2024

Message from Professor Ian Holliday, Vice-President (Teaching & Learning)

Dear colleagues,

### Policy

Our [GenAI policy](#) was endorsed by Senate in June 2023. It provides a framework for us to embrace new AI technologies fully and enthusiastically in our courses.

### Teachers

When S1 starts on September 2, we'll provide teachers with unlimited access to OpenAI tools [ChatGPT 4o](#) and [DALL•E 2](#). We encourage all teachers to explore the world of GenAI together with their students.

### Students

Students will have tokens worth the equivalent of USD1 per month to access any topic they like on ChatGPT 4o and DALL•E 2. Once their allocation of tokens has been exhausted, there will be no further access until the next month.

### Assessment

GenAI has implications for assessment. Last year many teachers revised their assessment tasks for a time when all students have access to GenAI tools. If you haven't yet done this, however, please do take a look at your assessments as a matter of urgency. We need to ensure that what we grade when we receive assignments is actual student work, even when ChatGPT and other GenAI tools are involved. For advice on GenAI and plagiarism, please visit our [plagiarism website](#).

### Security

You'll see from the June 2023 Senate paper that HKU can only ensure stringent data security and privacy protocols within its own GenAI supported and sanctioned tools. Staff and students must be aware that using non-HKU supported AI tools may expose them to inferior security measures. For optimal data protection, strict adherence to HKU GenAI security protocols is essential.

### Support

TALIC provides resources and support for all teachers. In September, the [HKU AI Clinic](#) will offer rapid response support services. Throughout the academic year, TALIC can be contacted at [talic@hku.hk](mailto:talic@hku.hk).

### Future

Looking ahead, in October we'll host a series of weekly discussion forums to determine where we plan to go with GenAI at HKU and how best to support teachers and students. I'll write soon with details.

Best wishes for 2024-25 — Ian

Professor Ian Holliday
