

## SYLLABUSES FOR THE DEGREE OF BACHELOR OF ARTS IN HUMANITIES AND DIGITAL TECHNOLOGIES

These syllabuses apply to candidates admitted to the BA(HDT) curriculum in the academic year 2026-2027 and thereafter.

### Overall curriculum structure

Candidates are required to complete courses totaling not fewer than 240 credits, comprising:

| Curriculum Structure                                                                    | Credits    |
|-----------------------------------------------------------------------------------------|------------|
| <b>University Graduation Requirements</b>                                               | <b>54</b>  |
| Common Core Curriculum                                                                  | 36         |
| Language Enhancement Courses                                                            | 12         |
| Artificial Intelligence Literacy Courses                                                | 6          |
| Successful completion of any other non-credit bearing courses as required               | /          |
| <b>Major in Humanities and Digital Technologies (HDT)*</b>                              | <b>96</b>  |
| HUDT1001. Digital skills I                                                              | 6          |
| HUDT1002. Digital skills II                                                             | 6          |
| HUDT2001. Text mining and text generation                                               | 6          |
| HUDT2002. Spatial and visual digital skills                                             | 6          |
| HUDT3002. Thinking machines, thinking with machines                                     | 6          |
| HUDT3100. Internship in humanities and digital technologies                             | 6          |
| HUDT4001. Research project in humanities and digital technologies (capstone experience) | 6          |
| HDT advanced interdisciplinary electives                                                | 12         |
| Humanities focus                                                                        | 42         |
| <b>Electives</b>                                                                        | <b>90</b>  |
| <b>Total:</b>                                                                           | <b>240</b> |

\* This Major is not offered to students from other curricula.

### Notes:

- 1) Candidates shall normally complete 60 credits in an academic year. The normal study load of Semester 1 and that of Semester 2 is 30 credits. Candidates may opt to take 36 credits in these semesters without seeking approval from the Faculty.
- 2) 12 credits in language enhancement courses, including a non-credit bearing Academic Communication in English course<sup>1</sup>, 6 credits in an “English in the Discipline” course and 6 credits in the Chinese language enhancement course<sup>2</sup>.
- 3) 90 credits in elective courses, which may include courses offered by any Arts and non-Arts teaching unit(s), except the Common Core Curriculum. It is optional for candidates to pursue a second major or up to two minors. These second major and minor(s) can be offered by the Faculty

<sup>1</sup> Candidates who have achieved Level 5 or above in English Language in the Hong Kong Diploma of Secondary Education Examination, or equivalent, are exempted from this requirement, and CAES1001 is optional.

<sup>2</sup> Candidates who did not study Chinese language during their secondary education and have not reached the required proficiency level for CART9001 may take a course in either Chinese language or Chinese culture offered by the Chinese Language Centre of the School of Chinese in lieu.

of Arts or other Faculties. Please note that candidates shall be required to take additional 6 credits for pursuing another major with requirements consisting of 96 credits.

---

### **Common Core Curriculum (36 credits)**

Candidates are required to complete 36 credits in the Common Core Curriculum within Year 1 to Year 3, comprising at least 6 credits and not more than 12 credits from each Area of Inquiry (AoI), with not more than 24 credits being selected within one academic year except where candidates are required to make up for failed credits.

---

### **Language Enhancement Courses (12 credits)**

- “CAES1001. Academic Communication in English” (non-credit bearing) in Year 1
  - Take *one* of the following “English in the Discipline” courses (6 credits) in Year 2:
    - CAES9201. Academic English: Countries and Cultures
    - CAES9202. Academic English: Literary Studies
    - CAES9203. Academic English: Philosophy and the History of Ideas
    - CAES9204. Academic English: History
    - CAES9205. Academic English: Language Studies
    - CAES9206. Academic English: Creative and Visual Arts
  - Take *one* of the following Chinese language enhancement courses (6 credits) in Year 3:
    - CART9001. Practical Chinese for Arts Students
    - CUND9001. Basic Spoken and Written Cantonese for Mandarin Speakers (Note: for Putonghua-speaking students)
    - CUND9002. Practical Chinese and Hong Kong society (Note: for Putonghua-speaking students)
    - CUND9003. Cantonese for non-Cantonese Speaking Students (Note: for Putonghua-speaking students)
    - CUND9004. Practical Applied Chinese Writing and Effective Presentation Skills for Non-local Mandarin Speaking Students (Note: for Putonghua-speaking students)
- 

### **Artificial Intelligence Literacy Courses (6 credits)**

- “AILT1001. Artificial Intelligence Literacy I” (3 credits) in Year 1
  - “AILT9009. AI Literacy 2: Humanities” (3 credits) in Year 2
- 

### **Major in Humanities and Digital Technologies (HDT) (96 credits)**

- **Compulsory courses:** Take *all* the following courses (totaling 42 credits)

#### Year 1:

- HUDT1001. Digital skills I (6 credits); and
- HUDT1002. Digital skills II (6 credits)

#### Year 2:

- HUDT2001. Text mining and text generation (6 credits); and
- HUDT2002. Spatial and visual digital skills (6 credits)

Year 3:

HUDT3002. Thinking machines, thinking with machines (6 credits)

Year 4:

HUDT4001. Research project in humanities and digital technologies (capstone experience) (6 credits)

Year 3 or 4:

HUDT3100. Internship in humanities and digital technologies (6 credits)

- **HDT advanced interdisciplinary electives:** Take *two* of the following within Year 2 to Year 4 (totaling 12 credits)

*Faculty of Arts*

HUDT2100. Emerging trends and trajectories in digital practices (6 credits)  
 HUDT2205. eXtended Reality (XR) in the humanities (6 credits)  
 HUDT2206. Humanities at play: Games and interactive design (6 credits)  
 HUDT2207. Databases, digital archives, and AI for cultural preservation (6 credits)  
 HUDT2208. Cultural evolution in the digital age (6 credits)  
 HUDT2210. Experiential learning in humanities and digital technologies (6 credits)  
 ARCL2020. Archaeological fieldwork experience (6 credits)  
 CAES2002. Online Digital Storytelling in English (6 credits)  
 CHIN2189. Media and modern Chinese literature (6 credits)  
 CHIN2296. Artificial intelligence and Chinese history research and teaching (6 credits)  
 CHIN2348. Bilingual studies in media and popular culture (6 credits)  
 CHIN2378. Harnessing AI in case law translation (6 credits)  
 CLIT2026. Digital culture (6 credits)  
 CLIT2100. Fugitive science: Science and technology studies (STS) approaches to facts and fakes (6 credits)  
 ENGL2050. English corpus linguistics (6 credits)  
 ENGL2103. Language and social media (6 credits)  
 ENGL2166. English phonetics (6 credits)  
 ENGL2195. Staging Asia (6 credits)  
 ENGL2198. Interactive narratives: Literature through new media (6 credits)  
 GCIN2115. Video game music (6 credits)  
 GCIN2117. History of the internet (6 credits)  
 GCIN2118. Introduction to video games studies (6 credits)  
 GCIN2119. Interactive media and narrative adaptation (6 credits)  
 GCIN2122. Streaming television: Developments, practices and processes (6 credits)  
 GCIN2123. Digital roleplaying games (6 credits)  
 GEND2010. Feminist science and technology studies (6 credits)  
 GLAS2101. Art, time, and new media (6 credits)  
 GLAS3101. Interculturality in a virtual world (6 credits)  
 HIST2136. The Graeco-Roman world: From Homer to Augustus (6 credits)  
 HIST2204. Technology and society: A modern history (6 credits)  
 HIST2205. Digital history: From concordances to big data (6 credits)  
 HIST2207. Printer, typesetter, reader, scribe: A global history of books (6 credits)  
 HIST2218. Medieval and early modern Korea (6 credits)  
 HIST3080. Historical gaming (6 credits)  
 HIST4037. Automating the Past: Artificial Intelligence and the Historian's Craft (6 credits)  
 JAPN2103. Artificial intelligence, androids, and automation in Japanese literature and popular culture (6 credits)  
 LING2066. Variation Analysis (6 credits)  
 LING2067. Natural language processing (6 credits)

- LING2068. Modelling language and languages (6 credits)  
 MUSI2088. Music, AI, and the Future of Creativity (6 credits)  
 MUSI3042. Music production: from ideation to realization (6 credits)  
 PHIL2225. The philosophy of artificial intelligence (6 credits)  
 PHIL2230. Philosophy and cognitive science (6 credits)  
 PHIL2656. Philosophy of virtual reality (6 credits)

*Faculty of Education*

- BSIM3021. Web development, users and management (6 credits)  
 BSIM3025. Multimedia and human-computer interaction (6 credits)  
 BSIM4019. Electronic commerce (6 credits)  
 BSIM4024. Fundamentals of object-oriented programming (6 credits)  
 BSIM4027. Selected topics in information management (6 credits)  
 BSIM4028. Principles and practice of data visualization (6 credits)

*School of Computing & Data Science*

- COMP3270. Introduction to artificial intelligence (6 credits)  
 COMP3278. Introduction to database management systems (6 credits)  
 COMP3314. Introduction to machine learning (6 credits)  
 COMP3329. Computer game design and programming (6 credits)  
 COMP3330. Interactive mobile application design and programming (6 credits)

- **Humanities focus:** Choose one of the following Arts disciplines as Humanities Focus. Take *6-12 credits* of introductory course(s) in Year 1 and *30-36 credits* of advanced courses from Year 2 to Year 4, all from the **same Arts discipline**, except for language-learning courses (e.g. “KORE1001. Korean I.1”). (totaling 42 credits)

Art History  
 Buddhist Studies  
 Chinese History and Culture  
 Chinese Language and Literature  
 Comparative Literature  
 English Studies  
 Gaming Studies\*  
 Gender Studies  
 General Linguistics  
 Global and Area Studies  
 History  
 Hong Kong Studies  
 Japanese Studies  
 Korean Studies  
 Music  
 Philosophy  
 Translation

\* For Gaming Studies, candidates should complete the following requirements:

Introductory course (6 credits from the course(s) below)

- HUDT1205. Introduction to gaming and gameplay (6 credits)

Advanced courses (36 credits from the courses below)

- HUDT2205. eXtended Reality (XR) in the humanities (6 credits)  
 HUDT2206. Humanities at play: Games and interactive design (6 credits)  
 HUDT2210. Experiential learning in humanities and digital technologies (6 credits)  
 GCIN2106. Gameworlds and imaginaries (6 credits)

|           |                                                                           |
|-----------|---------------------------------------------------------------------------|
| GCIN2107. | Total Design - Experiential designs in the age of the virtual (6 credits) |
| GCIN2118. | Introduction to video games studies (6 credits)                           |
| GCIN2123. | Digital roleplaying games (6 credits)                                     |
| HIST3080. | Historical gaming (6 credits)                                             |
| HIST4028. | History without borders: Special field project (6 credits)                |

Notes:

- 1) A course cannot be counted towards more than one requirement relating to a major and/or a minor. Hence, an Arts course listed as an “HDT advanced interdisciplinary elective” will be counted towards the HDT requirement by default. If this requirement is fulfilled, then it will be counted towards the requirement of “Humanities focus”.
- 2) Candidates may be required to take additional course(s) to fulfil the pre-requisite(s) or co-requisite(s) of a HDT elective, a course counting towards the Humanities focus or a free elective. Please refer to the relevant Programme’s syllabuses for course descriptions and enrollment conditions.

## **COURSE DESCRIPTIONS**

Not all courses are offered every semester or annually. Please check with the teaching units for their course offering around August.

### **Major in Humanities and Digital Technologies – Compulsory Courses**

#### **HUDT1001. Digital skills I (6 credits)**

This course provides foundational digital skills (basic programming skills, a clear understanding of data, data types and data structures, basic statistics) to approach the Arts and the Humanities with a 'digital mindset'. It is offered during the 1st semester of the academic year and strongly articulated with HUDT1002 (Digital Skills II) delivered during the second semester.

The course is explicitly focused on skills and hands-on practice, in connection with humanistic inquiries, with students engaging in multiple mini-projects during class time over the semester.

Co-requisite: HUDT1002.

Assessment: 100% coursework.

#### **HUDT1002. Digital skills II (6 credits)**

Delivered during the second semester, this course follows, and is strongly articulated with HUDT1001 (Digital Skills I), delivered during the first semester. It further builds students' ability to leverage digital and quantitative approaches (basic-to-intermediate programming skills; database design, implementation and query; elementary inferential statistic) for the Arts and the humanities. Specific attention is paid to data acquisition and data archiving, text mining and computer vision, as the related methodologies can be leveraged across many disciplines of the Arts and the Humanities. Attention is also paid to data visualization with a comprehensive understanding of its underlying psychophysical foundations.

The course is explicitly focused on skills and hands-on practice, in connection with humanistic inquiries, with students engaging in multiple mini-projects during class time over the semester.

Co-requisite: HUDT1001.

Assessment: 100% coursework.

#### **HUDT2001. Text mining and text generation (6 credits)**

This core mandatory course of the BA(HDT) programme follows the two Year-1 mandatory courses aiming at building students' set of digital skills (including some initial engagement with text mining (web scraping, regular expressions, tokenization, stemming, lemmatization, sentiment analysis, topic modelling), and further builds their understanding of digital technologies. The focus is on texts, as they power much of the current 'AI revolution', and both mining - i.e., how to extract insights from textual documents - and generation are considered. Students will leverage their knowledge of programming acquired in year 1 and learn how to perform a range of analyses they can later apply to any corpus of news articles, novels, online posts etc.

This advanced course covers a range of concrete methods and considers them in the light of broader frameworks: research inquiries (in the Arts / Humanities), commercial development, online diffusion of information etc. To this end, it includes significant hands-on practice, with students engaging in multiple and varied activities during class time over the semester.

Pre-requisites: HUDT1001 and HUDT1002.

Co-requisite: HUDT2002.

Assessment: 100% coursework.

---

### **HUDT2002. Spatial and visual digital skills (6 credits)**

This course provides foundational digital skills regarding spatial and visual computing and their approaches and applications for studying the Arts and the Humanities with a 'digital mindset'. It is offered during the second semester of the academic year and complements HUDT2001 delivered during the first semester.

Spatial and visual computing skills include working with three-dimensional and two-dimensional data such as 3D models, eXtended Reality, online Mapping, spatial analysis, computer vision, and image manipulation and analysis. The course is explicitly focused on skills and hands-on practice, in connection with humanistic inquiries, with students engaging in multiple mini-projects during class time over the semester.

Pre-requisites: HUDT1001 and HUDT1002.

Co-requisite: HUDT2001.

Assessment: 100% coursework.

---

### **HUDT3002. Thinking machines, thinking with machines (6 credits)**

As an advanced HDT course in the BA(HDT) programme, this course ambitions to develop higher-level thinking about the use and impact of digital technologies, in the Arts and beyond. To this end, it adopts multiple perspectives (from history, cognitive science, theory of activity) and practical engagement with the most recent developments of AI (agentic AI, LLM-based automation). A flipped-classroom pedagogical approach is adopted to leave ample time for supervised activities in the classroom, and assessment - with projects and essay-like contributions - includes a strong reflective component.

Pre-requisites: HUDT1001 and HUDT1002.

Assessment: 100% coursework.

---

### **HUDT3100. Internship in humanities and digital technologies (6 credits)**

This internship course provides students with an opportunity to broaden their undergraduate education through experiential learning. Students will acquire invaluable work experience, hone transferrable skills for a wide range of careers, and develop sharper awareness of the intersections between humanities and digital technologies in the workplace. Students enrolled into the course might work on research, fact checking, interviewing people, grant-writing and fund-raising, event management,

writing documents, reports or copy for publication, translation and communication, interpersonal speaking and writing, networking and outreach, data management, text encoding and/or database construction, website creation, social media management, or project development.

At the end of the internship, students will submit a written report (approximately 2,000 words) on work/project(s) conducted during the internship and a critical reflection on the internship experience, signed by the organisation contact. The report should reflect on how their interdisciplinary training integrates with the workplace experience, and how the experience enhances their personal development and growth, including whether the experience has helped them identify their strengths and areas in need of improvement.

During the semester, students will meet with the course supervisor at least twice to discuss the internship progress and the written report. The assessment of their performance is not based on specific assignments but their ongoing workplace experience, the evaluation provided by the host organisation, as well as the written report.

Pre-requisites: HUDT1001 and HUDT1002.

Assessment: 100% coursework.

#### **HUDT4001. Research project in humanities and digital technologies (capstone experience) (6 credits)**

This final-year project enables students to pursue their individual interests in any aspect of the intersection between humanities and digital technologies under the supervision of a faculty member. While students may choose the research route of producing an extended essay of approximately 5,000 words (supported by research with a strong digital component), this capstone experience explicitly encourages creativity and innovation, and (subject to the approval of the course coordinator and supervisor), students may be approved to undertake a creative or digital development project. If the latter option is chosen, students will also submit a written report (approx. 2,000 words) on their project, describing and reflecting on the process of their work. Students are expected to meet with their supervisors regularly and to present their work-in-progress to their supervisors in the course of the semester.

Pre-requisite: HUDT1001 and HUDT1002.

Assessment: 100% coursework.

### **Major in Humanities and Digital Technologies – Advanced Interdisciplinary Electives**

#### **HUDT2100. Emerging trends and trajectories in digital practices (6 credits)**

This course offers advanced exploration of digital practices, providing students with a deeper understanding of the tools involved. By engaging in themed and topical projects within specific disciplines, students can refine their interests for capstone projects and internship opportunities. These disciplines include but are not limited to archival and data retrieval, heritage and cultural preservation, virtual reality, media creation, artificial intelligence, creative industries, digital twins for industries, design, and game culture.

Assessment: 100% coursework.

#### **HUDT2205. eXtended Reality (XR) in the humanities (6 credits)**

eXtended Reality (XR), encompasses the range of three-dimensional (3D) digital-visual technologies that include Virtual Reality (VR), Augmented Reality (AR), and Mixed Reality (MR). XR provides users with immersive visual experiences by placing computer graphics into their view. XR has become vital in transforming many fields, including entertainment, learning, training, and industrial production pipelines. Within the humanities, XR's immersive experiences have the potential to reshape human

cultural landscapes and our interaction with the arts. In this course, students will gain insights into the emerging landscape of the experience economy and further investigate the new ecology of this economy, its components, and their implications for humanity's future. Students will gain some experience with creating 3D models and building immersive experiences for the humanities while experimenting with the latest hardware. We will explore how XR technologies can change the way we research and teach about the humanities, such as exploring reconstructed ancient sites in archaeology or experiencing virtual music in 360 degrees, or yet how history may be archived or investigated. Students are encouraged to critically examine the socio-cultural changes brought about by these technological paradigms.

Assessment: 100% coursework.

---

### **HUDT2206. Humanities at play: Games and interactive design (6 credits)**

The humanities ask crucial questions about humans, culture, and history—but the answers are never final. Instead, they emerge through continual reinterpretation from new perspectives. In today's digital world, these interpretive encounters are increasingly shaped by interactive forms: visualizations we explore, maps we navigate, conversations we engage in, and games we play.

This course bridges humanities inquiry and digital innovation by treating interaction as a mode of interpretation. Students learn how cultural materials can be transformed into interactive experiences across a spectrum of digital forms, including interactive visualizations, web-based mapping, dialogic systems, and playable game prototypes. Among these, digital games serve as a central—though not exclusive—medium, offering a particularly engaging way to explore how rules, systems, and player choice structure meaning.

The course also incorporates AI as part of contemporary interactive workflows. Students experiment with AI-assisted tools for content transformation, generation, and prototyping, while critically reflecting on how AI reshapes interaction, interpretation, and authorship in humanities projects. Emphasizing hands-on experimentation and project-based learning, the course equips students to design interactive works that engage humanities questions in rigorous, playful, and technically informed ways.

Assessment: 100% coursework.

---

### **HUDT2207. Databases, digital archives, and AI for cultural preservation (6 credits)**

This course introduces students to the principles and practices of data management, database construction, and digital archiving for cultural preservation. Students will learn the fundamentals of relational database design, SQL, Python, and SQLite through hands-on work with cultural and archival datasets. Topics include querying databases, creating and modifying tables, cleaning metadata, and building a small archive-style database. The course also examines how AI is transforming digital preservation, archival discovery, and access through OCR, handwritten text recognition, automated metadata generation, image restoration, and automatic speech transcription. Case studies may include charred papyri, damaged manuscripts, fragile sound recordings, faded paintings, and hidden archaeological sites. Through technical training, case study analysis, and ethical reflection, students will consider how digital technologies shape what societies preserve, discover, access, and remember.

Assessment: 100% coursework.

---

### **HUDT2208. Cultural evolution in the digital age (6 credits)**

This course explores how stories, languages, manuscripts, material culture, and cultural traditions change as they are copied, shared, adapted, and passed down. Students will build practical skills in R and learn how computational methods can be used to trace patterns of inheritance, borrowing, innovation, and contact across humanities data. Drawing on examples from manuscript studies, language change, and cultural evolution, the course introduces key approaches such as tree thinking and

computational methods adapted from the biological sciences, including parsimony methods and Bayesian methods. Students will learn to evaluate how data, assumptions, and models help shape our understanding of the past. Through substantial hands-on practice, culminating in the replication of an existing study, students will develop skills in coding, data analysis, interpretation, and critical evaluation.

Assessment: 100% coursework.

### **HUDT2210. Experiential learning in humanities and digital technologies (6 credits)**

This course provides structured experiential learning in humanities and digital technologies through lectures, and/or field trips to businesses, cultural sites, and events. It will be offered periodically with a specific theme selected by experts in the field, including scholars and industry practitioners. Students will gain first-hand insight into professional practice and examine the technological, cultural, organisational, and social issues associated with the selected theme.

Assessment: 100% coursework.

Please refer to the BA syllabuses, which are available at <https://arts.hku.hk/current-students/undergraduate/regulations/>, for the course descriptions and enrollment conditions of the other eligible Arts courses.

## **Major in Humanities and Digital Technologies – Other Electives**

### **HUdT1205. Introduction to gaming and gameplay (6 credits)**

Video games have emerged as a dominant cultural medium in the modern world, serving as a powerful economic engine and a critical instrument of national soft power. Studying games—along with their socio-cultural impacts—is essential to understanding the ongoing evolution of play in human civilization. Leveraging artificial intelligence, students can now gain unprecedented perspectives on the historical and cultural development of gaming. This course challenges students to interrogate the role of gameplay in education, entertainment, and the preservation of collective memory, while framing digital play as a legitimate contemporary art form. Through the critical assessment of game mechanics and player experiences, students will research and reflect on their own interactive histories, envisioning new paradigms of play while translating these insights into actionable, real-world skill sets.

Assessment: 100% coursework.

Please refer to the BA syllabuses, which are available at <https://arts.hku.hk/current-students/undergraduate/regulations/>, for the course descriptions and enrollment conditions of the other eligible courses.

## **Artificial Intelligence Literacy Course**

### **AILT1001. Artificial Intelligence Literacy I (3 credits)**

Artificial Intelligence (AI) literacy is essential for navigating our modern society effectively and responsibly. This course provides students with the skills and knowledge needed to understand AI concepts, interact with AI systems, and critically evaluate their impact. Through lectures, online learning activities and a practical project, students will explore the ethical, social, and technological dimensions of AI, preparing them to make informed decisions in a world that is increasingly AI-driven.

Assessment: 100% coursework (graded on a distinction/pass/fail basis).

**AILT9009. AI Literacy 2: Humanities (3 credits)**

This course invites Arts students to engage with artificial intelligence (AI) through a humanities lens. Students will explore how AI is reshaping traditional humanities disciplines—such as literature, history, philosophy, and the arts—both as a tool and as a subject of inquiry. At the same time, the course considers how the critical and reflective approaches of the humanities can help us better understand AI itself: its underlying concepts, cultural significance, and its profound influence on contemporary life, identity, and society. Through case studies, discussions, and creative exploration, students will be encouraged to critically examine AI's promises and pitfalls, and to reflect on its role in shaping our understanding of what it means to be human.

Assessment: 100% coursework (graded on a distinction/pass/fail basis).

---

**English Language Enhancement Courses****CAES1001. Academic Communication in English (non-credit bearing)**

The course is designed to equip first-year undergraduate students with a solid foundation in academic English literacy to succeed in their university studies. The course is dedicated to nurturing students' competencies in an English-medium university environment and fostering their confidence in effective oral, written, and visual communication. This is achieved by cultivating students' critical reading skills, information literacy skills, and digital literacy skills for academic English learning. The course also provides students with a comprehensive understanding of academic rhetoric across different mediums, including written, spoken, and visual tasks. By familiarizing students with the key genres and communication conventions in university education, the course empowers students to apply the acquired knowledge and skills to Common Core Courses.

Assessment: 100% coursework.

---

**CAES9201. Academic English: Countries and Cultures (6 credits)**

This course aims to help students develop the English language skills they need to succeed in their major. The course is open to all BA, BA(GCIN), BA(HDT) and BA&BEng(AI&DataSc) students, but is most relevant to the needs of students majoring in, or intending to major in, American Studies, Art History, China Studies, Chinese History and Culture, Chinese Language and Literature, Comparative Literature, European Studies, Gender Studies, Global and Area Studies, Global Creative Industries, Hong Kong Studies, Japanese Studies, Korean Studies, a modern language, and Music. **Chinese Language Enhancement Courses**

Students are required to successfully complete the 6-credit Faculty-specific Chinese language enhancement course (CART9001) for graduation, except for

- (a) Non-local Putonghua/Mandarin-speaking candidates who should take “CUND9001 Basic Spoken and Written Cantonese for Mandarin Speakers”, “CUND9002 Practical Chinese and Hong Kong Society”, “CUND9003 Cantonese for Non-Cantonese Speaking Students” or “CUND9004 Practical Applied Chinese Writing and Effective Presentation Skills for Non-local Mandarin Speaking Students”; and
- (b) Students who did not study Chinese language during their secondary education and have not reached the required proficiency level for CART9001 should seek approval from the Board of the Faculty for exemption from the Chinese language enhancement requirement, and take a course in either Chinese language or Chinese culture (CHIN95xx) offered by the Chinese Language Centre of the School of Chinese in lieu.

#### **CART9001. Practical Chinese for Arts Students (6 credits)**

This course is designed to promote the students’ professional use of Chinese language in the workplace. The course will familiarize students with modern Chinese grammar, the correction of mistakenly written Chinese characters and various types of practical Chinese writings in professional contexts. Students are required to complete a series of communication- rich oral and written assignments and an examination. Special emphasis is given to the style and rhetoric of reader-based writings to heighten students’ linguistic sensitivity.

This course will be offered in the second semester of the third year.

Assessment: 50% coursework, 50% examination.

---

#### **CUND9001. Basic Spoken and Written Cantonese for Mandarin Speakers (6 credits)**

This intensive Cantonese language course is designed for Mandarin (Putonghua) speakers who have no prior knowledge of Cantonese. The course aims to assist students in mastering Jyutping, the Cantonese romanization system, while simultaneously cultivating students' ability to communicate effectively in Cantonese, both orally and in written form, across a variety of situational conversations. Throughout the course, students will be exposed to practical sentence structures and a wide range of useful vocabulary related to various aspects of daily life. Furthermore, the curriculum allows students to gain insight into Hong Kong culture.

Assessment: 70% coursework, 30% examination.

---

#### **CUND9002. Practical Chinese and Hong Kong society (6 credits)**

This course is specifically designed for the students from the Mainland. With Putonghua as the medium of instruction, it aims to underscore the characteristic styles and formats of practical Chinese writings in the workplace context in Hong Kong. Topics addressing the rhetorical strategies for reader-oriented professional writings are included to strengthen the students’ command of the language. The evolution of Cantonese and the lexical and phonetic systems of this dialect will be explored. The local history and culture of Hong Kong will also be considered. On-site visits are organized to deepen the students’ understanding of local traditions and, more importantly, to enhance their ability to appreciate and accept cultural and regional differences. Students will be able to apply the concepts and skills to accomplish different tasks effectively and persuasively in diverse and complex issues in oral and written forms as well as to produce good-quality practical writing.

Assessment: 50% coursework, 50% examination.

---

#### **CUND9003. Cantonese for non-Cantonese speaking students (6 credits)**

This course is designed specifically for Putonghua speaking students that are proficient in the use of the Chinese language. It aimed at enabling students to learn the characteristics of Hong Kong written and spoken Chinese language, to discover the differences in vocabulary and expression between the Cantonese dialect and Putonghua. Through a comparative analysis of Putonghua and Cantonese, this course will familiarize students with traditional and simplified Chinese characters, strengthening their communication skills in everyday life, and to have a proper understanding of the culture, traditions and people in Hong Kong. This course is essential to students who must adapt to lifestyle in Hong Kong within a short period of time.

Assessment: 60% coursework, 40% examination.

---

**CUND9004. Practical Applied Chinese Writing and Effective Presentation Skills for Non-local Mandarin Speaking Students (6 credits)**

The course aims to cultivate non-local Mandarin-speaking students' logical thinking and critical thinking skills. Through the exploration of various interdisciplinary knowledge topics, students are encouraged to analyze and evaluate information, such as a variety of the essays mainly focusing on the important social and economic issues, as well as the movies released between 1995 and the present. The students will also be provided with opportunities to engage in writing, group discussions and presentation, allowing them to practice their critical thinking skills and develop their ability to express their thoughts effectively using Mandarin. CUND9004 will construct a coherent, sustainable, and in-depth content to help students build strong arguments, enhance their lexical and syntactic knowledge, as well as enhance their ability to analyze information, construct well-reasoned arguments, and make informed decisions.

Assessment: 70% coursework, 30% examination.
